Re; Department of Physics of Medicine, Cambridge.

For the attention of Gary Webb

Dear Sirs,

We write to record our appreciation of the efforts and professional attitude that T R Freeman Ltd have shown in completing the complex zinc cladding and substrate works on the above project to a high standard of workmanship on budget and to programme. They demonstrated a proactive approach throughout with a positive attitude towards programming, sequencing and health and safety matters.

Their management team and site operatives worked well together with Willmott Dixons and the Architect to achieve the initial design intent and we would be pleased to work again with T R Freeman Ltd and would have no concerns in recommending them for future projects.

Yours faithfully

WILLMOTT DIXON CONSTRUCTION LIMITED
